Personal Summary

Software Engineering Master's student at KTH specializing in Distributed Systems, Machine Learning, and Generative AI, currently working as a Machine Learning Engineer Trainee at Intrum, building production-grade Intelligent Document Processing and RAG pipelines on Databricks. Winner of the Kolomolo AI Business Value Hackathon at AWS Sweden HQ, and eager to contribute to the KTH AI Society – from LLM/RAG-based systems to sharing knowledge through workshops. Combines hands-on engineering (Databricks, Azure DevOps, LangChain) with two published research papers and a track record of student leadership.

Skills

AI/ML & Frameworks: PyTorch, Hugging Face, Scikit-Learn, LangChain, LlamaIndex, Vector DBs, RAG, LLM Fine-tuning

Data & MLOps: PySpark, Delta Lake, Databricks (Medallion Architecture), Azure DevOps (CI/CD), AWS (SageMaker, EC2), Google Cloud, Docker, Git, SQL, MongoDB

Languages & Tools: Python, JavaScript, C/C++, Bash, Java, REST APIs, Node.js, React, Agile/Scrum

Work Experience

Intrum June 2026 – Present

Machine Learning Engineer Trainee

Stockholm, Sweden

- Building an Intelligent Document Processing (IDP) pipeline on Databricks with OCR, AI-based parsing/classification, and medallion-architecture extraction.
- Set up an Azure DevOps CI/CD pipeline with automated unit tests and job scheduling, triggered by pull requests, pushes, and merges to main.
- Developing a RAG-based chatbot for intrum.se for automated, context-aware responses.

Confidence Software Limited

July 2024 – July 2025

Software Developer

- Worked on RAG-based web features and RESTful APIs (Node.js, Python) connecting frontend and backend systems.
- Supported AWS/Docker-based deployment and Agile development practices.

Reddot at Robi Axiata Limited (Telecommunication Company)

May 2023 – Sept 2023

Software Engineering Intern

- Built and evaluated baseline NLP models using Hugging Face transformers for text classification.
- Designed automated data preprocessing/validation scripts in Python and Selenium during Scrum cycles.

Education

KTH Royal Institute of Technology

Aug 2025 – Present

Master's in Software Engineering of Distributed Systems

Stockholm, Sweden

Coursework: Distributed Systems, AI & Intelligent Agents, Software Reliability & Security, Data Mining, Scalable Machine Learning and Deep Learning.

Project Work

- **Enterprise Scale RAG & GenAI Knowledge Base:** Semantic search and answering engine using LangChain and open-source embedding models, with persistent vector stores and Docker-deployed inference pipelines. *Python, LangChain, Vector DB, AWS, Docker.*

Research Publications

- **Skin Cancer Detection – Deep Learning (IEEE UIC 2023):** Transfer learning (DenseNet201, ResNet50, VGG16) achieving 91% validation accuracy.
- **Maternal Mental Health Optimisation (IEEE ICICT 2024):** Boosting ensembles for postpartum depression prediction (XG-Boost 99.15%, LightGBM 96.15%, CatBoost 94.02%).

Leadership, Awards & Certificates

- **Winner – Kolomolo AI Business Value Hackathon (Feb 2026):** Built a P&L forecasting model analyzing public financial data; competed among 150+ participants at AWS Sweden HQ.
- **Operations Executive, IUT Computer Society (IUTCS):** Led operations, sponsorship, recruitment, and club budgets.
- **RPM Volunteer, Students' Nobel NightCap (SNNC), Sweden (2025):** Coordinated transport logistics for volunteer teams.
- **Certifications:** IBM Python for Data Science, AngularJS Certification, TestDome.
